Subject: Heads Up from Cal DPR: Glyphosate

I just got off the phone with George Farnsworth and Marylou Verder-Carlos. Next week, probably on September 4th, California will be proposing to list glyphosate as a carcinogen, under Prop. 65. This is what is called a proposed ministerial listing. Under Prop. 65, as I understand it, if IARC determines that a chemical is a carcinogen, OEHHA is required to list the chemical under Prop. 65.
